

# *Windows Azure and the Cloud Computing Opportunity for Developers*

Matt Valentine  
Enterprise Solution Director  
Microsoft Hong Kong  
[Matt.Valentine@Microsoft.com](mailto:Matt.Valentine@Microsoft.com)

# The Transformation Of ICT

Cloud Computing

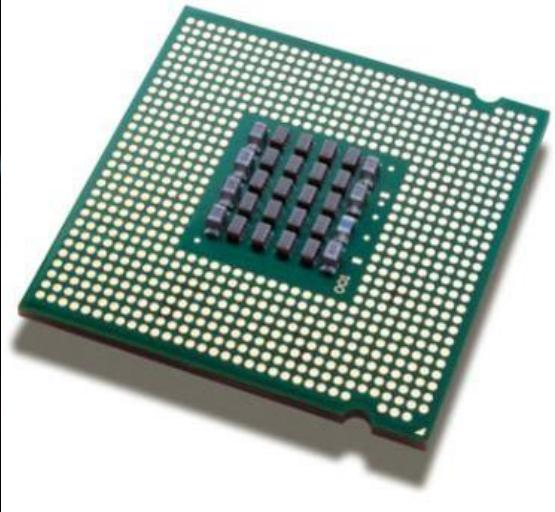

Application Development

72% of tech students believe that everything they see in SciFi films will turn real in their lifetime

# The Digital Accelerators of Change

## Processing Power

Computer processing power doubles every 18 months.

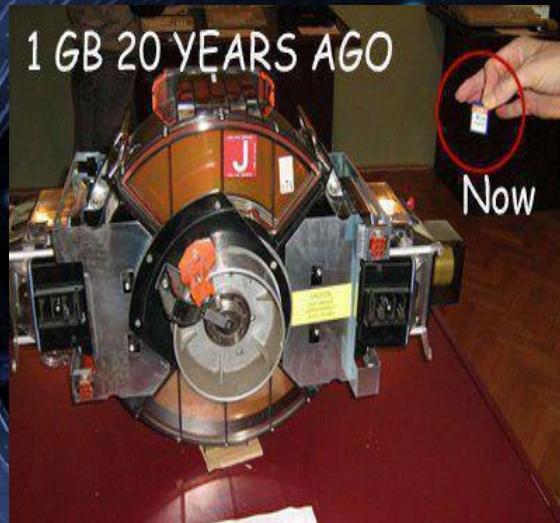

## Bandwidth

Digital bandwidth is doubling faster than processing power

## Storage Capacity

Digital data storage is doubling every 12 months

Your cell phone has more computing power than NASA used to put a man on the moon in 1969

# Enter Cloud Computing

Scale, optimization and shared resources drive cost savings.

Delivering applications and services over the internet using web and internet standards.

Scalable, elastic and flexible. Pay as you go, and only for what you use

Xbox LIVE members now number 46 million, with over 2 million online concurrently

# Today's Application Developers

Developing for devices and cloud services

Choose open standards, tools, frameworks and platforms

Continuously need to deliver high quality apps faster and cheaper.

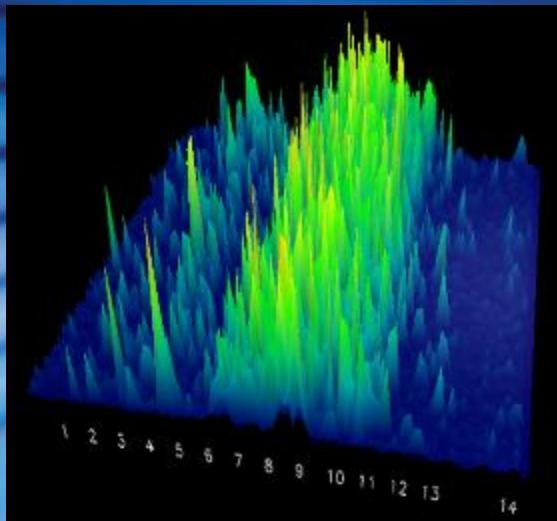

Programming is a race to build idiot-proof apps, and the universe trying to produce better idiots

# Enter Big Data

We can store everything,  
connect everything and  
compute anything

New data, patterns and models  
result in new hypothesis,  
information and knowledge

Help humans explore,  
visualize and understand  
massive amounts of data

As of 2012, about 2.5 exabytes of data are created each day, and that number is doubling every 40 months

# Characteristics of Big Data

New data sources

Real-time and fast moving data

Massive data volumes

More video is uploaded to YouTube in 60 days than the three major US TV networks created in 60 years

*Organizations that leverage the power of analytics in their decision-making and strategic planning processes, **outperform their competitors by up to 3 times.*** – McKinsey

*"By 2015 businesses that build a modern information management system will **outperform their peers financially by 20 percent.**"* – Gartner

# So, what can Big Data do for my business?

*"How Big Data Is Changing the Whole Equation for Business"* WSJ, March 8, 2013

*75% of business leaders say more predictive analytics would **drive better decisions.** Almost one-third (32%) of respondents expect the impact would be transformational.* - McKinsey

***Top-performing companies are three times more likely than lower performers to be sophisticated users of analytics,** and are two times more likely to say that their analytics use is a competitive differentiator* - MIT Sloan School of Management

**Marketers can make campaigns more effective and convert more customers.**

Shippers are using sensors on trucks to find ways to speed up deliveries.

**Hiring managers study how candidates answer questions to see if they'd be a good match.**

**Manufacturers can trawl through thousands of forum posts to figure out if customers will like a new feature on their product.**

Big Data is about improving decision-making by becoming a data-driven organization.

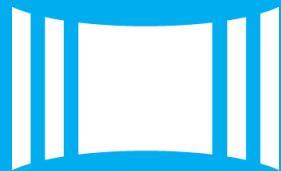

# WINDOWS AZURE

# Introducing Microsoft Windows Azure

- Windows Azure is Microsoft's Cloud Platform
- Hosted in Microsoft's data centers around the world
- Physical facilities:
  - Provides redundant platform services and failover
  - Broad compliance certifications (ISO/IEC 27001:2005, SSAE 16 / ISAE 3402)
  - State-of-the-art security and access control
  - <http://www.windowsazure.com/en-us/support/trust-center/>
- For developers, flexibility, choice and openness
- For Big Data, storage, analysis and distribution

# Windows Azure

Developer Center

Windows Azure is an open cloud platform that enables you to quickly build, deploy and manage applications across a global network of Microsoft-managed datacenters.

You can build applications using any language, tool or framework.

The screenshot shows the GitHub organization profile for WindowsAzure. At the top, there's a navigation bar with links for Signup and Pricing, Explore GitHub, Features, Blog, and Login. Below the header, the organization's name "WindowsAzure (Windows Azure)" is displayed next to its logo. To the right, there's a "ORGANIZATION" icon.

Key statistics are shown: URL (<http://www.windowsazure.com>), Location (Redmond, WA), and Member Since (Sep 20, 2011). It also shows 7 Public Repos and 34 Members.

The main content area is divided into two sections: "Public Repositories (7)" and "Organization Members (34)".

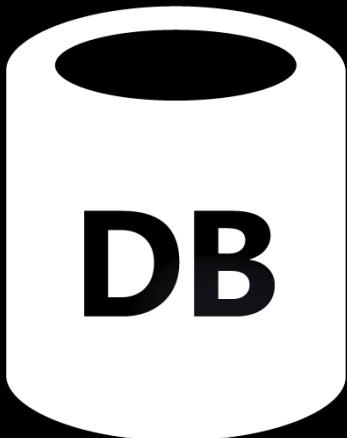

**Public Repositories (7):**

- azule-sdk-for-java**: Java, 95 commits, 23 forks. Description: Windows Azure SDK for Java. Last updated 3 days ago. Commit chart shows 52 week participation.
- azule-sdk-for-net**: C#, 219 commits, 29 forks. Description: Windows Azure SDK for .NET. Last updated 4 days ago. Commit chart shows 52 week participation.

**Organization Members (34):**

- abhishek1al (Abhishek Lal) - 1 Public Repository, 0 followers
- andrerod (André Rodrigues) - 9 Public Repositories, 17 followers
- antonba (Anton Babadjanov (Microsoft)) - 1 Public Repository, 5 followers
- bennage (Christopher Bennage) - 15 Public Repositories, 46 followers
- blobaugh (Ben Lobaugh) - 17 Public Repositories, 10 followers
- BorisMoore (Boris Moore) - 9 Public Repositories, 196 followers
- cscrosati (Christopher Scrosati) - 0 Public Repositories, 0 followers
- davidfowl (David Fowler) - 24 Public Repositories, 257 followers

# SQL database

- ← Relational SQL Server Engine in the Cloud
- ← Clustered for high availability
- ← Fully Managed Service
- ← SQL Reporting support

# SQL database

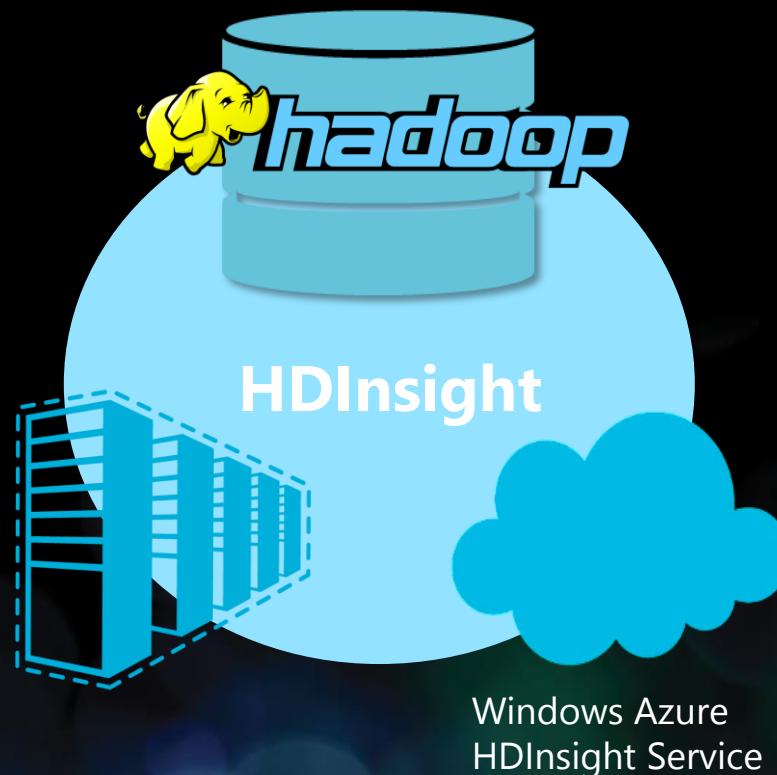

demo

# Hadoop and Microsoft

## Hadoop

- Open source framework from Apache
- Distributed app for large data sets
- Hadoop kernel, MapReduce & HDFS
- Optimized for unstructured data
- Batch oriented
- Petabytes of data

## Microsoft HD Insight

- Includes Hadoop
- Engineering for Windows
- Integrated Security, Management & Virtualization
- Can use Excel, PowerPivot and Powerview

## Customer Quotes

"[The Boeing 737 Explained tool on Windows Azure] makes this the best thing that customers can see, next to actually walking around and through a real aircraft."

- Diana Klug, Director of Marketing,  
Boeing Commercial Airplanes

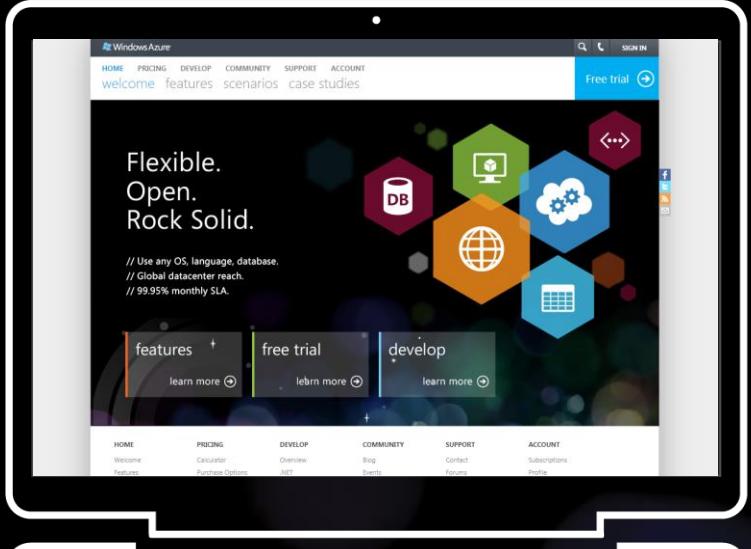

"With Windows Azure, we don't have to worry about data center infrastructure. Microsoft takes care of ... maintenance tasks so we can focus on what we do best—designing innovative mailing solutions."

- Paul Aronson,  
Director of Engineering, Pitney Bowes

"What's most exciting about bringing Windows Azure into the Intuit Partner Platform is that developers now have a best-in-class 'platform as a service' to both build applications and deliver them to market."

- Alex Chriss,  
Director, Intuit Partner Platform, Intuit
